More information about the performance of your application. These numbers don't directly affect the Performance score.

PASSED AUDITS (12) Show

### Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

#### NAMES AND LABELS

▲ Image elements do not have [alt] attributes

Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

#### **BEST PRACTICES**

[user-scalable="no"] is used in the <meta name="viewport"> element or the [maximum-scale] attribute is less than 5.

These items highlight common accessibility best practices.

Docs

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more about Google Search Essentials.

#### CONTENT BEST PRACTICES

Document does not have a meta description

Image elements do not have [alt] attributes

~

Format your HTML in a way that enables crawlers to better understand your app's content.

#### CRAWLING AND INDEXING

Links are not crawlable

~

To appear in search results, crawlers need access to your app.

#### ADDITIONAL ITEMS TO MANUALLY CHECK (1)

Show

Run these additional validators on your site to check additional SEO best practices.
